

REACH FOR MORE

At Bryan College of Health Sciences we can help you take your career to the next level.

RN-BSN Completion Option

Why a Bryan College of Health Sciences RN to BSN Completion Option?

Flexibility—you learn online and meet face to face with faculty three time per semester

Application—this approach to education, allows students to directly apply classroom knowledge into their clinical practice

Small classes—allows coursework to be individualized to meet students' needs and learning experiences which improves patients' experiences

Clinical experiences—may be individualized within your community settings

Looking to manage a team?—our management courses allow you to work directly with nursing managers and house supervisors. We find that students learn best when it is hands on and pertains to their everyday work life.

"I love the hybrid format. It allows me to work independently, work with my faculty and classmates. It is the best of both worlds."— Betsy

Here's an example of what our students have been doing...

- Nurse Satisfaction survey administered and evaluated on unit
- Revision of workplace computer system
- Implementing a timely process for nurses to receive feedback from their patients
- Assessment of impact on nurses who work rotating shifts

80%

Did you know? By 2020, the Institute of Medicine (IOM) recommends that 80 percent of nurses have a minimum of a bachelor's degree

Statistics	3 CR	Non-Nursing Cultural Focus	6 CR

Here is what our current students have to say:

“Even though I was dreading going back to school, I will have to say that I have enjoyed the classes I have taken so far as they have opened up my eyes to how I can better my nursing practice. This not only benefits me, but my patients that I am caring for as well.” — Andrea

“Patients are sicker and I know that research shows that an increase in BSN prepared nurses is associated with decreased patient mortality. This and knowledge that I have earned with a BSN will lead to increased confidence and maturity. I had clinical skills but the BSN program taught much more than clinical.” — Jody
